

OM SANJAY MANE

+91 9969387515 — ommane2002@gmail.com — linkedin.com/in/ommane24 — https://github.com/MsdMane7

Summary — Motivated and detail-oriented graduate student pursuing a Master's degree with a focus on Data Science and Possesses strong foundational expertise in data analysis and machine learning, coupled with proficiency in Python. Passionate about applying data-driven insights to solve complex problems and support strategic decision-making.

Education

M.Tech Computer Science (AI)

Indian Institute of Information Technology, Pune

August 2024 – June 2026

B.E. Information Technology

University Of Mumbai

August 2020 – June 2024

Skills

- **Programming:** Python, C, SQL
- **Tools:** Microsoft Azure, Microsoft Excel, Power BI, Powerpoint, MySQL
- **Libraries and Framework:** Pandas, Numpy, PyTorch, Scikit-Learn, Matplotlib
- **Platforms:** PyCharm, Jupyter Notebook, Visual Studio Code
- **Soft Skills:** Rapport Building, People Management, Excellent Communication, Strong Stakeholder Management
- **GenAI:** Prompt Engineering, LLM Fine-Tuning, LangChain, Hugging Face Transformers, RAG, Chatbot Development

Projects

Real Estate Data Science Application

- Developed predictive models to analyze real estate data and forecast property prices with an accuracy of 90%, using Python and machine learning techniques.
- Engineered and transformed 20+ key features from raw real estate data, including location-based metrics, property attributes, and market trends, significantly enhancing model accuracy and reducing mean absolute error by 15%.
- Optimized model performance using hyper-parameter tuning, reducing prediction error by 15%, training time by 20%.

ChatPulse: Insights From WhatsApp Conversations

- Built a WhatsApp Chat Sentiment Analyzer using Natural Language Processing (NLP) to analyze chat history and determine sentiment polarity with 85% accuracy.
- Processed 2,500+ messages, leveraging Python libraries like Pandas, Matplotlib, and Scikit-learn for data preprocessing, visualization, and sentiment analysis.
- Designed a user-friendly interface to visualize chat statistics, including word frequency, emoji usage, and message trends.

AI Desktop Assistant Using Python

- Developed an AI Desktop Assistant using Python that integrates speech recognition, natural language processing, and text-to-speech, improving task automation efficiency by 40%.
- Implemented 10+ functionalities, including web browsing, file management, system control, and weather updates, enhancing user convenience and multitasking capabilities.
- Led a 3-person team to build the project, integrating PyAudio, SpeechRecognition, and pyttsx3 for seamless interaction.

Internships

TapFin, Hybrid: Data Scientist intern

Feb 2025- Present

- Web-scraped 5,000+ data points on EVs and batteries from OEM and aggregator sites; built a model to analyze performance. Performed statistical analysis on 10+ datasets, identifying trends in battery performance and reducing data processing time by 30%.
- Currently researching Large Language Models (LLMs) to develop an intelligent chatbot for answering EV domain queries and enhancing customer interaction efficiency.

Cognifyz Technologies, Remote: Data Scientist Intern

Nov 2024- Feb 2025

- Revamped the quality of a large-scale restaurant dataset by identifying and rectifying inconsistencies in more than 2,000 records during the process of rigorous data cleansing and advanced feature extraction efforts.
- Conducted an in-depth price range analysis, uncovering key correlations between pricing, restaurant ratings, and customer satisfaction to drive data-informed decision-making.

Certifications

- Salesforce Certified AI Associate
- HackerRank Gold Level SQL Badge
- Azure Certified Data Scientist Associate(Coursera)
- Python Essential I & II (Cisco Networking Academy)
